

PRESS RELEASE

Amrax partners with Agile Business Technology to bring Metaroom® to Sub-Saharan Africa

Salzburg, Austria / Stellenbosch, South Africa – September 8, 2025 – Amrax, the company behind the pioneering digitization platform Metaroom®, today announced its exclusive distribution partnership with Agile Business Technology, a leading provider of software solutions for the AEC industry across Africa.

Through this partnership, Agile Business Technology will become the sole distributor of Metaroom® in the Sub-Saharan region, giving architects, engineers, property developers, government agencies, contractors, and consultants access to a mobile-first solution that transforms how existing spaces are captured and digitized.

With Metaroom®, users can scan single rooms, multi-floor spaces, or entire buildings in minutes using an iPhone Pro or iPad Pro. The platform automatically generates accurate 3D models and 2D floor plans that can be exported into over 30 CAD and BIM formats ensuring seamless integration into established workflows.

“Africa is one of the most dynamic regions in the world when it comes to urban growth and building development,” said Martin Huber, CEO of Metaroom by Amrax. “Digitization is the foundation for building faster, smarter, and more sustainably. With Agile’s proven expertise and strong regional presence, we are confident that Metaroom® will empower professionals across Sub-Saharan Africa to save time, reduce costs, and unlock new opportunities in design and operation.”

Agile Business Technology is known for bringing best-in-class solutions to BIM-ready customers in Africa. As the exclusive distributor of Metaroom®, Agile continues its mission to support the industry with innovative tools that advance digital construction.

“We see Metaroom® as a natural addition to our portfolio,” said Jaco Barnard, Managing Director at Agile. “Its ease of use, speed, and compatibility with leading CAD and BIM platforms will be a game-changer for our customers who face the challenges of site surveys and building documentation daily.”

The partnership marks a significant step in making cutting-edge Scan-to-BIM workflows accessible to a wider market, strengthening the digital transformation of the construction and real estate industries in Sub-Saharan Africa.

About Metaroom by Amrax

Amrax, the company behind Metaroom®, specializes in AI-powered 3D scanning technologies and delivers accessible tools for spatial digitization. With the Metaroom® Scan App, a simple smartphone scan instantly transforms into an intelligent, editable 3D model ready for planning, design, and building optimization. Metaroom® Workspace completes the platform with support for 30+ export formats and seamless integrations into leading software. Together, the Scan App and Workspace form a powerful end-to-end platform to digitize spaces with unmatched speed and simplicity. www.amrax.ai
