

PRESS RELEASE

Lehner Lifttechnik and Metaroom by Amrax Announce Strategic Collaboration

Neukirchen am Walde / Puch bei Hallein, October 14th 2025 – Austrian lift manufacturer Lehner Lifttechnik and Metaroom by Amrax, the leading platform for digital measurement and 3D planning, have entered into a strategic partnership. The collaboration aims to simplify and accelerate the entire process of stairlift measurement and planning through innovative digital solutions.

As part of the collaboration, Metaroom developed StairScan Pro, a stair scanning app specially tailored to Lehner Lifttechnik's requirements. This solution will enable staircases to be measured more quickly and accurately in future, and it will be launched on the market in the first quarter of 2026 alongside Lehner's new NEO single-rail system.

Visitors to Interlift 2025, taking place from October 14–17 in Nuremberg, will get an initial glimpse of the collaboration. Detailed product information will be released at a later date. Both companies share the common goal of making lift planning and installation more efficient and future-proof through the use of digital tools.

“For decades, Lehner Lifttechnik has stood for quality and innovation in the field of accessible mobility. We are proud to work together on a project that marks the next step toward digital innovation in lift construction,” says Martin Huber, CEO of Amrax.

“Collaborating with Metaroom allows us to seamlessly integrate digital measurement into our future processes — creating real value for our partners and customers,” adds Christian Lehner, Managing Director of Lehner Lifttechnik.

About Lehner Lifttechnik

Based in Neukirchen am Walde, Austria, the family-owned company has over 30 years' experience in developing and manufacturing high-quality platform and chair stairlifts, as well as vertical platform lifts. Committed to quality, safety and innovation, the company is represented by distribution partners in over 80 countries worldwide.
