JOB OPENING · SYNTHETIC DIMENSION

DevOps Engineer (Cloud Infrastructure)

Help us run and evolve the AWS infrastructure behind our spatial computing and AI products.

`30–38.5 h/week` `On site in Puch Urstein (Salzburg)` `1 day home office` `~20 people`

WHO WE ARE

Small team. Real people.

We are a cloud-native company working on spatial computing and AI. There are about 20 of us, so everyone knows everyone.

New people get a proper onboarding, not a wiki link and good luck. If you have a question, the person who can answer it sits a few desks away.

People come before process. We keep the process we need and drop the rest.

```
# people > process
  o    o    o       +--+    +--+
 /|\  /|\  /|\  >   |  |--->|  |
 / \  / \  / \      +--+    +--+
```

WHO WE'RE LOOKING FOR

Pragmatic. Curious. Reliable.

We care more about how you work than about a list of certificates.

Pragmatic. You pick the simplest solution that works and don't over-engineer.

Open to new approaches. You're curious and willing to question how things are done now.

Reliable, with a strong sense of responsibility. When you own something, it gets done and stays running.

```
# how we decide
simple   > clever
curious  > certain
owned    > handed off
```

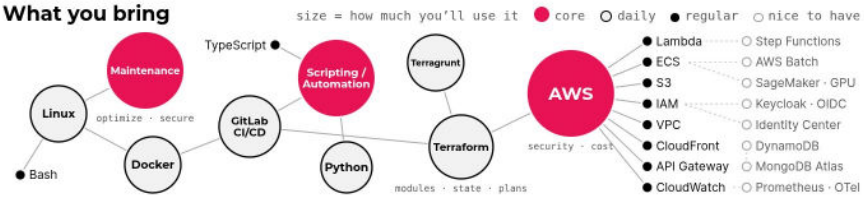

What you'll work on

- Developing and maintaining our production and development infrastructure with **AWS, Terraform and Terragrunt**.
- Running internal infrastructure and our **GitLab CI/CD** pipelines.
- Not all of it is new builds. Maintenance, upgrades and internal tooling are a real part of the job.

What we offer

- **30–38.5 h/week**: part- or full-time, your pick
- **From €4,061 gross/month** (full-time, collective agreement), overpayment negotiable
- **Flexible hours** and **1 day of home office** a week
- **Challenging problems**, not just tickets to close
- **No silos**: work directly with devs and product
- **Real team spirit**: we help each other out

What you bring

ALSO **2+ years** in DevOps, platform or SRE · a **security mindset** · **clear written English** (German in person a plus)

Caught your attention? Send us an informal CV, even if you only tick half the boxes. We'd love to meet you at our office in Puch Urstein.
